Mines and Prospects-Furnaces and Mills

TELL A STORY ON NEWHOUSE

Astonished at Mines and Big Mill,

Guests of the Master Miner Tell of His Achievements in Southern Country

Methods at Plant and Practice Underground a Revelation That Astonished Them

"At the plants and properties of the Newhouse mines and mill in the southern country." said James A. Pollock on his return from that ideal camp, where he had been the guest of Hon. Samuel New-'I was introduced to the biggest surprise I ever saw, and my personal ob-servations have embraced not a few of the biggest that are operated in the Western country. It is undoubtedly the most magnificant plant, with the greatest variety of labor-saving devices, that it has been my privilege to visit, and considering that it is a new one it is at this time achieving results that compare favorably with. If they do not exceed, those recorded at the oldest plants. Every unit of the many that have been knitted into it appears to be perfectly adapted to results the founder had in view, and not one but is today discharging its worth with remarkable integrity. The methods employed in the mill cannot but instruct the mechanical engineer as well as the metallurgist, whoever he may be or whatever his experience. To me the wealth which has been plucked out within the mines upon which this magnificent plant is drawing was a revelation equally astonishing, said the president of the Salt Lake Mining exchange. "The resources now exposed and ready for reduction approach myidea of the exhaustless as close as anything I have ever investigated. Undoubtedly Mr. Newhouse has something that is acquired by few in the diggings and yet we know of no fallures in his record. It justifies all that has been expended upon it for the reduction of these ores or that which has unselfishly been done by him to promote the comfort and contentment of those around him."

Over what had been seen by him during his visit to Mr. Newhouse's latest camp of copper, Clarence K. McCornick was equally enthusiastic. "Underground I was shown the biggest fissure that has ever come under my observation," said he, "and certainly no one who has made an inventory of its contents can arrive at any conclusion other than that has ever come under my observation," said he, "and certainly no one who has made an inventory of its contents can arrive at any conclusion other than that in these properties Mr. Newhouse has claimed the greatest acquisition in his record as a master miner in the State of Utah. I saw ore bodies, indeed, which show a width of from 150 to 250 feet, the presence of copper revealed in astonishing quantity in every face. The method of extraction is as marvelous as are those employed in its reduction. Everything is delivered at the mill automatically, nor sidering that it is a new one it is at this time achieving results that compare fa-vorably with. If they do not exceed,

bunkhouse and preity cottages all tell of comfort."

Mr. Newhouse, who returned to town yesterday morning as much pleased with conditions at his new camp, perhaps, as were his visitors, announced that he has placed orders for two Hancock jigs, cach having a capacity of 700 tons daily, these to be delivered within the next six weeks, and with their installation the management will be permitted to reduce from 1500 to 2000 tons of copper, gold and silver-bearing ore daily. Vice-President Louis N. Kramer, who was with the party, left for his home in New York last night much pleased with conditions, as was Mr. R. E. Dearbergh of London, who will remain several days a guest of Mr.

On the return the party was accompanied by Mill Manager Bettles, who was equally pleased with the behavior of the big plant.

ACTIVITY AT PIOCHE.

To Tap the Lower Workings of Peavine Group of Mines.

Work has been started up on the prop erty recently acquired by Messrs. Miller and Scott, consisting of five mines situated about one-half mile southeasterly from town, says the Record of Ploche, from town, says the Record of Ploche, Nev. A contract was let to Alex Orr & Co. to run the first 109 feet of a tunnel. The tunnel will start in the gulch near the northeast corner of the Ross mining claim, and will be driven toward the workings of the Peavine mine. After the contract is completed there will be another contract let to drive the tunnel ahead until the lower workings of the Peavine are reached. The tunnel, when completed, will be about 309 feet or more in length, and is being driven for the purpose of cutting a couple of porphyry dykes and ledges running through the intervening ground. The contract calls for two shifts to be employed continuously until the contract is finished.

The main working shaft will be sunk on the porphyry dyke running through the Boss ground, being the same porphyry dyke which runs from the Raymond through Spring Mountain on toward the Alps.

Utah's Boston Traders.

Utah's Boston Traders.

The Boston correspondent of the Engineering and Mining Journal, writing from that city on the market, says: "United States Mining, Bingham Con., Utah Con. and Boston Con., all Utah stocks, have been well looked out for by houses havling New York connections. United States broke, but railled, while Bingham broke, with a \$2 recovery. Utah is being constantly corralled by a house in which one of the partners is related to H. H. Bogers. This stock has varied from \$42.55 to \$43.25 and made the \$1 advance, while the balance of the list was soft. Boston has varied from \$7.75 to \$8.12%, quite large blocks being dealt in."

DAY ON 'CHANGE.

The Bears Again in the Ascendant on Dull Market.

on the mining exchange pened with the sale of 32,133 shares of stock, for which \$7935.76 was paid, and with the more active traders provokingly unruly, the bears generally vicious. Carisa led the procession in its retreat as did it last week in its advances, not-withstanding the fact that reports from new territory are all favorable to big results. New York was in the same cate-gory and sold down to 8t cents, while gory and sold down to 81 cents, while another car of rich ore was making its way to the formaces, while Lower Mammoth went all to pieces and flattened out to 22 cents, although the market had the assurances of those who had seen it on Sinday that its condition was a very gratifying one. May Day gave good account of itself, notwithstanding the ugly attitude of the shorts toward it, and recorded fractional advances, while Uncle Sam closed on a transfer at 37% cents. Alax was strong at 16% cents, the buyer claiming sixty days in which to pay for it, while Naildriver sold down to 62 cents, with Daly coming out to a bid of \$2.45, with Victoria changing hands at \$1.75. Victor Con. was much in evidence around 4 cents, as was Little Chief, while Star Con. maintained its position at 10 cents, the day closing on the following market:

Boston Con. Mill

Convictions of Those Who Have Been Shadowing the Company's Field Representatives.

While the management itself declines to affirm it, the news from Lehi, from Prove and neighboring camps is all conducive to a conviction that the home of the new mill with which it is proposed to reduce 19,000 tons of ore daily by the Bos-ton Consolidated is to be within a stone's throw of Pellcan Point and upon the margins of Utah lake. While the representatives of Mr. Newhouse, president of the Feston Consolidated, have sought artfully and adroitly to conceal their identity and to obscure their purpose, it would be difficult for Mr. Hanchett, the general manager on the Newhouse staff, for Hon C. C. Parsons, counsel for all of the Newhouse enterprises, and for Mr. Henderson, who was recently purloined by the sugacious Newhouse, to convince any one in the southern country that recent visits to that region were in the interest of other than the gigantic plant with which the Boston Consolidated management has decided that it shall be equipped. Correspondence from there last night says without a stutter whatever that positively the big concentrator will be located there, the orea with which to supply it to be transported over a line of railway for which Mr. Henderson and his corps are now making the survey. Assuming that these prophets have correctly foretold the intention of the company, the people of that region may rely upon it that it will be the scene of an undertaking on the part of Mr. Newhouse and his associates that shall exceed all previous ones, and that there he will build a town as imposing as that which has characterized his endeavors in Beaver county. However, the time to go into details is when the management of the Boston Consolidated shall relax and take the public into its confidence. throw of Pelican Point and upon the mar

GOLD CROWN PURCHASE.

Properties Said to Have Been Acquired by Adrian C. Ellis.

Local advices indicate that the properties of the Gold Crown Mining com pany at Tonopah, Nev., have passed into the hands of none other than Adrian C the hands of none other than Adrian C. Ellis, Jr., and associates in this city, the company under the reorganization which is to follow his returp, to prosecute its labors along the most energetic lines. While the Gold Crown has not been productive to date, its territory consists of nothing leas than a slice of ground wedged between the properties of the Mentana and those of the Midway companies in that camp, the veins of each of these pointing unerringly to Gold Crown territory. It was said of the transaction yesterday that before the deeds to this acquisition shall have passed Mr. Ellis and his associates will have forked out to the vendors several hundred thousand dellars, instead of the grice to which reference was made in The Tribune's receat bulletin from San Francisco. Dr. George E. Ellerbeck, the well-known deatist of this city, who was present in California when the deal was consummated, pleaded on his return to town that he was prohibited from saying anything whatever about it, adding that he had been in pursuit of pleasure during his absence and not in pursuit of mining properties. Mr. Ellis, equally prominent in legal circles and among the first of Salt Lakes investors to cmbrace opportunities that were held out to them at Tonopah, is expected to return to town the last of the week, when full particulars probably will be released. Ellis, Jr., and associates in this city, the

GOLDFIELD GREAT BEND

Reorganization of Company With Colorado Interests at Helm

The reorganization of the Goldfield Great Bend Mining company, with prop ertles favorably located in Nevada's great camp of gold, which took place in great camp of gold, which took place in this city yesterday, indicates quite conclusively that the control of that undertaking has passed into the hands of Colorado Springs mining men and investors. In the reorganization Clarence Edsall is made vice-president of the company, with Frank E. Gillespie its treasurer and Fred L. Shorwin of the same city a member of the board of directors. To provide for those new officials, resignations were submitted during the day by Messrs. Frank B. Cook, John A. Kirby and William M. Bradley, who have been with the proposition since its original organization. The transaction by which these interests are admitted to the family circle affords, said Mr. Cook, ample means with which to carry out all the company's plans, and should result, in his opinion, at an early day in the disclosure of wealth for which the company has been seeking. It is understood that Vivian P. Strange, under whose supervision the work thus far has progressed, will return to this city to give local interests his personal attention, his successor to be designated by the officials at Colorado Springs. Of course, S. A. Whitney retains his position as secretary of the company and will continue to direct the affairs at the general offices in this city this city yesterday, indicates quite con-

CON. MERCUR EARNINGS.

Management Steadily Adding to Contents of the Treasury.

While President John Dern would not go into particulars, there are many assurances that the carnings of the Con-Mercur are at present exceeding any that Mercur are at present exceeding any that have been achieved for several years, and that a dividend will be passed around next month, as foretold, appears to be quite well assured. The ores are maintaining a most satisfactory average and the management has reason to congratulate itself throughout.

Meantime the management of the Sacramento is piling up another consignment of quicksilver, while producing the usual volume of gold buillion from its ultra-gold-bearing ores.

bearing ores. Boston Coppers Quiet.

Special to The Tribune,
BOSTON, Mass., May 1.—The copper
share market acted very well, considering
the early weakness in New York. There
was very little liquidation to be seen
as soon as the market showed a tendency
to rally, numerous buying orders being
seen all around the room. Utah was
the feature in the copper share group,
the same kind of persistent buying being
noticed throughout the day. In the afterncon traders bid up, prices in an endeavor
to cover short contracts put out on the
veakness, which caused a sharp rally
that continued until the close. Hornblower & Weeks, brokers, 33 State street,
Boston, and 19 Wall street, New York,

UTAH IN TONOPAH.

Interests in Great Camp and How They Are Behaving.

Of Tonopah properties in which the Salt Lake investor is interested, the Miner of that big camp says: Drifting on the big Midway ledge on the 425 level continues in both directions, the drift to the west being out 100 feet and the drift to the east being out 150 feet. The values are being maintained in both faces. Work progressing in the upraise fifty feet west of the crosscut and also in the winze in the east drift, seventy-five feet from the crosscut. About 100 tons of high-grade ore is being sacked weekly, and it is all being taken out in the course of development, no stoping having been done

The Jim Butler Mining company has been compelled to cease work in the west drift on the Valley View vein from the Valley View with from the Valley View what on account of bad air, but the east drift on the 40 level to the Stone Cabin is still being pushed and is in good shipping ore. A crosscut has also been started borth from the Wandering Boy shaft to strike the vein from which the old Fraction company extracted some high-grade ore.

the old Fraction company extracted some high-grade ore. The O'Meara-Lynch company recently purchased the group of four claims composing the holdings of the Tonopah Comstock Mining company, and will organize a new company, to be known as the Tonopah Common Mining company, to operate the property in connection with the seven claims embraced in the Table Mountain group, belonging to the O'Meara-Lynch company, it is understood that the Tonopah Comstock received \$60,000 for its holdings.

MUCH FREE GOLD.

Gold Quartz Brought in From a Recent Discovery.

Special to The Tribune.

CALIENTE, Nev., May 1.-J. Dula, a ranchman living twelve miles south from Callente, brought into camp today twenimmense values in free gold. He claims to have taken it from a recently discovered ledge on his land, and has lo-cated and staked several claims on the strike of it. Several local mining men have gone to the scene of the reported

have gone to the scene of the reported strike, and already a number of promising claims have been staked on the newly discovered ledge.

It is currently reported that Kilbourne & Son, the San Diego millionaire mining men, have made their first payment on the properties of the Caliente Gold Mining company, in this camp, and that a mill of large capacity will be placed in commission within the next thirty days. This means immense advantages to Caliente, as the properties lie adjoining the town site and their extensions are all owned by local men. Assays from \$12.50 to \$57 have been reported from the upper open-cut at grass roots, and Messrs. Kilbourne and Paxman, the latter an expert mining man, have reported, it is said, these claims as the most promising they have examined in this part of Nevada.

Four freight teams left Caliente today with immense loads of provisions and supplies for residents of the new gold camps in the Kawich and Lida districts, and regular daily shipments are now being made to the rich mining camps of the and regular daily shipments are new be-ing made to the rich mining camps of the Kawich and Goldfield districts.

AT LOWER MAMMOTH.

Strike on Contact Affords Assurance of Good Results.

E. M. West, who devoted his Sabbath o a day at the Lower Mammoth of Tintic, says that conditions there are all that have been represented, and that the proposition affords more encouragement than at any period in several years. On the 1200-foot level, through which the contact was reached a few days ago, he reports from ten to eighteen inches of reports from ten to eighteen inches of ore, the assays from which certify to from thirty to ninety ounces sliver per ton. It is upon the contact that Superintendent Ball believes the ore bodies for which the search has been persevering will be encountered, and to demonstrate it he is doing his work most vigorously. In the drift off the winze on the 1400-foot level, he reports a large body of second-class ore which had been penetrated for about fifteen feet when he left, while everything is in a most encouraging condition.

MORE SHOSHONE ORE.

Two-Car Lot Now Piling Up Under Guard at Las Vegas.

The \$15,000-a-ton Shoshone ore, which is rriving from Bullfrog, is being stored in tents near the ice plant, where it will be under guard until enough has arrived to fill two cars, when it will be forwarded to the Murray smelter at Salt Lake, says the Age of Las Vegas, on the San Pedro Route. George H. Atkins of Milford, Utah, for-

George H. Atkins of Milford, Utah, for-merly of De Lamar, who has been at Good Springs looking after some mining interests he has there, spent a couple of days in Las Vegas this week. Mr. Atkins reports that the newest strike in the Good Springs district has been made at the Red Cloud mine, in a large body of ore running over \$1400 in free gold.

The Copper Market.

The Copper Market.

The Engineering and Mining Journal, commenting on the copper market, says: There has been an entire absence of demand, both from domestic and foreign sources, during the week under review. On this account a number of lots of lake and electrolytic copper, which were forced for sale, had an altogether disproportionate influence on prices. However, as the stallstical position is sound and business in all lines continues at a very satisfactory rate, it is generally believed that the market will soon become active.

Sought a Piece of It.

It was told upon the street during the afternoon that local investors had succeeded in disledging a portion of the Montgomery holdings in the great Sheshone mine at Bullfrog, and that at the next meeting of interests Sait Lake would be accorded representation on the board. While it was impossible to verify the story, it is known that a strong appeal was made by the friends of Mr. Montgomery in this city to induce him to permit at least a small interest in the undertaking to remain in Zion.

Headed for Midway.

Apropos of the Montana strike of Tues Apropos of the Montana strike of Tuesday it may be said that the same ledge, after running 890 feet further in the Montana ground, enters the Midway, and this fact, taken into consideration with the showing already made there, may be expected to have due effect in the upward movement of the stock now anticipated by nearly all holders, writes J. A. Magill of Tonopah to the Journal of Reno.

Shipments Via Tonopah

The ore shipments over the Tonopah railroad this week aggregated 2220 tons, of which 123 tons came from Goldfield says the Miner The shipments are divided as follows: From Tenopah, Tonopah company, 128 tons; Tonopah Extension, 275 tons; Montana Tonopah, 28 tons; Midway, 116 tons; Belmont, 170 tons; From Goldfield, Goldfield Ore Sampling company, 121 tons; Connor & Steinheimer, two tons.

Ore and Bullion

In the ore and buillon market the day's set-tlements amounted to \$65,000, McCornick & Co. reporting them as they follow. Bullon, \$28,700, gold, sliver, lead and copper ores, \$28,-

In the metal market silver ruled at 55% cents an ounce, lead at \$1.509.450 per hundred pounds, and casting copper at 14% cents a pound.

Blasts of Giant From Deep Creek

Recent Developments Tell of Rich Ores of Many Varieties in the Camps Over There.

While there is a great deal of activity going on in Deep Creek at present, said William Carman on his arrival from there resterday, and a larger number engaged in it than at any period since boom days in it than at any period since boom ucys in that region, not half as much interest is manifested in results as is that manifested in the assurance that in the Western Pacific railway its camps are to soon find an outlet for their ore. Mr. Carman came in accompanied by his wife and says that while on the Pole Star and others of his properties at Clifton he might now begin the marketing of ore of inequality, he will not do so until means of transportation that encroach to less extent upon its values have been provided. Some have said that the ores of that region cannot be relied on to go to the deep, said Mr. Carman, but this is contradicted with much emphasis in disclosures that have been recently made by Senator Robinson and associates at a depth of 309 and 409 feet. At these depths the ores show as good valuation as they do at any portion of the ledges above, and that they will continue to improve there is every reason to believe. Mr. Carman and wife will remain in the city for some time. n that region, not half as much interest

BLAZING THE WAY.

Experting the Field in Behalf of the Union Pacific System.

Capt. William Dayldson, who has been prospecting various regions by which the rails of the Union Pacific system are penetrated, came in from the hills again yesterday, and will disappear again the last of the week. While the Captain, who has been for so long a time identified with the camps of the West, and who is among the most experienced authorities, would not discuss his labors, an impression prevails that upon the result of his observations just now depends at least one extension which the railway company has long had under consideration. As the superintendent of the old Niagara system of mines at Bingham for many years, not a few of the results that have been achieved by the big companies in that camp were foretoid by the Captain, and while much has been accomplished, he is relying on the old camp for other mines as big as those that have been already developed. Capt. William Davidson, who has been

Mining Notes.

Alexander, manager of the Black Dia f Stockton, came in from camp again

last night.

The Uncle Sam of Tintic vesterday added \$1507 to the contents of its stocking, this the proceeds of a single carload of ore.

Coldfield Sun: A story is in circulation in Rhyoits today that Sait Lake people are on the ground looking for a nile to erect a \$50,000 chlorination plant.

Frank Janney, superintendent of the Utah Copper company's mill in Bingham canyon, was among the arrivals from camp during the day.

Manager Dern of the Uncle Sam leaves for that Tintle proposition fomorrow.

A. L. Jacobs manager of the Butler-Liberal, and under whose endeavers it has attained its prominence among Bingham's great possibilities, leaves for camp this morning accompanied by James J. Burke, the mechanical engineer.

ral engineer.

Ira Jones, who has served the mining exchange in the capacity of caller for as long a time, has returned after an absence of several months in California, much improved in health. His box is being temporarily filled by J. T. Goodwii, who has served at intervals in that capacity for several years.

Manager C. E. Loose of the Grand Central has returned from Bodie, Cal., where he is the owner of valuable interests.

W V Rice leaves for the East today or

Ploche Record Arthur Murphy, formerly superintendent of the E. & F. Mining com-pany, has been reappointed to the same post-tion and will arrive any day and take charge of the property at Bristol. W. W. Armstrong departed for his interests at Park City yesterday morning.

Herman Greene, cashler of the Bingham on, left for the diggings yesterday morning. Con. left for the diggings resterday morning. The management of the Manmoth marketed another lot of ore from its Tinuc properties during the day.

Tonopah Miner H. E. Simmons, who owns a group of claims adjoining the Beicher at Lone menutain, reports a great deal of activity in that section.

Martin Murphy leaves for the East today to promote a deal involving valuable interests in the Builfrog region, Nevada.

Herman C. Beilinger of the Yampa smelter

Herman C. Bellinger of the Yampa smelter van in from its Blingham furnaces during the
